OBJECTIVE

I have experience in the field of web developers for more than 10 years, starting before graduating from college I had worked as a junior web programming using Codeigniter Framework which included PHP, CSS, HTML, JavaScript and MySQL.

Now I am Senior Web Developer can build professional websites from the ground up by using the CodeIgniter, Laravel and Magento Framework platforms. Also JavaScript libraries such as AJAX, ReactJs, NodeJs, VueJS etc. Able to complete projects efficiently and satisfy customers with attractive and user-friendly websites. I have a good analytical thinking , I love to learn new things and like new chellenges especially in the field of programming technology.
